CAREER OBJECTIVE

Seeking challenging assignment in dynamic organization that will strategically utilize my existing skills sets while providing opportunities to amalgamate personal enrichment with professional goals.

TECHNICAL SKILLS

- Language: HTML, CSS, Bootstrap , Tailwind ,JavaScript, React Js, Node Js, Redux, RESTful API .
- Database: MongoDB, Sql
- Tools: Postman, Visual Studio Code
- Devops Tools: Git, Github,
- Cloud: S3 Bucket

WORK EXPERIENCE

Job Role	Company Name	Duration
WordPress Developer	Chennai Adman(Internship)	01/12/2021 TO 31/01/2022
Junior Software developer	Valor Paytech(Fulltime)	28/02/2022 TO 31/03/2023,
Software developer	Axess Technology(Fulltime)	03/05/2023 TO 31/08/2023

PROJECT

VIRTUAL TERMINAL TRANSACTION

- React-JS, Node - JS, SQL
- Developed a web-based Virtual Terminal Transaction application using React.js for the frontend, Node.js for the backend, and SQL for the database. The project focuses on facilitating secure and efficient transactions. Responsibilities included designing and implementing frontend interfaces, creating backend logic, and managing SQL database interactions .

BOARDING MERCHANT

- React-JS, Node - JS, SQL
Contributed to a web application project called 'Boarding Merchant,' where administrators can efficiently onboard merchants using a dedicated API. Collaborated on designing and developing the application, enabling seamless merchant onboarding through the web interface .

Student Education Track

- React-JS, Node - JS, MongoDB
In the Employee Project, I actively participated in the development of a web-based platform comprising a student portal and an admin dashboard. My responsibilities included crafting an intuitive frontend for students to access frontend and backend development materials, implementing a secure admin registration system with topic assignment capabilities, and ensuring robust authentication and authorization mechanisms. This experience enriched my skills in web development, user interface design, database management, and cybersecurity, showcasing my ability to contribute effectively to complex projects while prioritizing data security and user experience.

ROLES AND RESPONSIBILITIES

- React JS Developer
- Designed and developed the web application using React JS, contributing to its overall functionality and user experience.
- Programmed and improved project features using coding skills, enhancing the application's capabilities and user benefits.
- Actively maintained the web application, ensuring its stability, performance, and Continued usability over time.
- Created reusable components that encapsulated core functionalities, Promoting Modularity and efficiency in development

EDUCATION

Pgp College Of Arts and Science - Namakkal

B.Sc (MicroBiology)

(2018 – 2021)

DECLARATION

I declare that the details furnished in this resume are true to the best of my knowledge and Belief.
